PATIENT HANDLING TRAINING MANIKIN

FOR PROFESSIONALS WHO SAVE LIVES

Ruth Lee is a family business whose core values revolve around the care of our employees, service to our customers and uncompromising product quality. We are proud to serve YOU, the dedicated professionals who make such a valuable contribution to society.

We employ highly skilled people and source the most durable materials to ensure our products meet the highest international standards.

Our manikins are designed to represent the correct anatomic weight distribution of a real person, and we offer a range of different models to suit every conceivable scenario. This ensures that your training is as realistic and as effective as possible; preparing you for all eventualities.

PATIENT HANDLING TRAINING MANIKIN

IDEAL FOR THE FOLLOWING TRAINING SCENARIOS:

Health & Safety Training within the Hospital and Care sector. Moving and handling exercises including early mobilisation, emergency evacuation and working with lifting/transfer/evacuation equipment.

Train your staff to avoid back injuries associated with unsafe, high risk moves when handling patients and aid compliance with Manual Handling Operations Regulations 1992 (Health & Safety at Work Act 1974).

SPECIAL MATERIALS:

Constructed from the same flame retardant material used in Police ballistic/stab vests, offering 4x the strength and abrasion resistance of 16oz canvas or P.V.C. (conforms to OEKO-TEX® Standard 100, BS EN ISO 12947-2 & 14116: 2008). High density polypropylene webbing (25mm rated to 207 Kg, 50mm rated to 440Kg).

FEATURES & BENEFITS:

- Anatomically correct weight distribution to give the 'feel' of a real patient.
- Constructed with an elongated plastic spine which allows the manikin to sit upright in bed, a wheelchair or hoist - essentially acting as a

'conscious' patient would.

- Strong webbing loop at the back allows easy handling and storage.
- Soft body joints to eliminate the risk of pinch welts and bruising; common injuries when using plastic bodied manikins.
- An immobilisation/extrication collar can be fitted around the neck of our adult manikins to promote proper casualty care.
- Supplied with pyjamas which are easily washable for improved hygiene in hospital and care home environments.
- Comes complete with soft boots which are easily replaced if damaged.

OPTIONAL EXTRAS:

- Facemask and wig to add realism.
- Overalls can be purchased if preferred.

EXTENSIVELY USED BY:

- Hospitals & NHS Trusts across the UK.
- Care Homes.
- Age UK Training Centres.
- Specialist Health & Safety Training Organisations.
- Equivalent organisations across North & South America, Europe, Australia and Asia.
